NATIONAL INSTITUTES OF HEALTH

P.S. I have also got Harvey Flano as speaker & tentative acceptance by Roger Herriott. Perhaps we will be too successful! - in that event we must have alternating 20 ~ 10 min talks. Why not? I guess that I must include Frankel-Conrat & Zamenhof too. I am of course first contacting Rollin Hotchkiss & Matthew Meselson.

Dear Josh,

I have been asked to scramble a symposium together in Biochem Sect of A.C.S., Sept 7-10, Chicago. Title: "Chemical Genetics." I am not too keen to arrange & esp. not on this time. Yet I manage to get Cyr Levinthal and Bill Dreyer.* I am writing Benzer. What about you? Please, let me know what topics you might like to present within that broad framework - if you should be back from Stockholm. I imagine that the speaking time would be 30 (or 40) min. More details whenever I hear from you. - also more detail about "99" - we are trying to analyze cell wall of "96" grown on glucose.

Answer you

Itan

*
And a very
good chance
of getting
Roger
Herriott.
